

# Comparison Worksheet

Use the worksheet below to help you choose the health care plan that is right for you. The first column calculates the annual cost of the new Blue Point 2 POS Value Plan based on the average usage by a family of four\*. The second and third columns have been left blank for you to determine the cost of any plan based on your particular circumstances. Simply fill in the number of doctors' visits, prescriptions, etc. that you (or you and your family) incur in a year and multiply them by the appropriate co-pay. Then add the annual payroll deduction from the attached rate sheet to estimate your total cost for the year. Compare the cost of various plans to determine the plan that is best suited to your needs.

	BLUE POINT 2 POS VALUE			OTHER			OTHER		
	Average Number	x Co-Pay	= Annual Cost	Average Number	x Co-Pay	= Annual Cost	Average Number	x Co-Pay	= Annual Cost
Primary Care Doctor Visits	8	x \$20	\$160						
Specialist Visits	2	x \$20	\$40						
Well Child Visits	2	x \$0	\$0						
Eye Exams	2	x \$20	\$40						
Mammograms	1	x \$20	\$20						
OB/GYN Exam	1	x \$20	\$20						
Emergency Room Visit	1	x \$50	\$50						
Prescription Drug	11	x 10/25/40	\$275						
Payroll Deduction for Premium	24	x12.78	\$306.72	24			24		
Total Annual Employee Cost	<b>VALUE:</b>		<b>\$911.72</b>	<b>TOTAL:</b>			<b>TOTAL:</b>		

\* Based on an employee hired before April 15, 2005, who has a family plan and average usage for two adults and two children.
